Hello Chris,

Hope all is well around Newport. I just arrived back from the Arctic and our 12-day cruise onboard the Norseman II. I have some really nice videos and photographs to share with you once we get all our data sorted.

In the mean time I wanted to let you know that the Acrobat system performed extremely well and we ended up mainly using that as our data gathering tool throughout the cruise. We are still counting but we towed over 1700 km of track and collected over 4000 CTD profiles with the system. Pretty amazing! Thank you for building such a high-quality system - I am very impressed.

I will get back to you with some sample sections, photos and under-water video sometime next week.

Best,
Peter
